

COMMANDCENTRAL VAULT

MAXIMIZE THE VALUE OF DIGITAL EVIDENCE

Major shifts in the information technology landscape over the years have made the collection and analysis of digital evidence increasingly important for solving crimes and preparing court cases. There are, in fact, instances where cases which don't include digital evidence may not be prosecuted at all.

However, many departments are behind the curve in managing digital evidence so it can be effectively used. This is due in part to rapid changes and proliferation of sources of digital evidence, and limited budget allocation for access to the proper tools and personnel needed to successfully manage the growing amounts of content.

ENSURE JUSTICE IS ACHIEVED

CommandCentral Vault is a cloud-based digital evidence management solution that intelligently organizes all of the photos, videos, audio files, and more that your agency collects, making it easier to search, manage, analyze, and share.

With CommandCentral Vault you can simplify content management processes for records staff, make case evidence more quickly available for review by detectives and then facilitate seamless sharing of it, chain of custody intact, with the prosecution, other partners and where appropriate, the community, to ensure justice is achieved.

In a workshop conducted by the RAND corporation and the Police Executive Research Forum (PERF), one evidence examiner noted that digital evidence is "as important as firearms, fingerprints, DNA" and that "more cases are being solved on digital evidence than anything else right now."

KEY FEATURES

Google-Like Search

Easily find the content you're looking for using free-text search, filtering and grouping based on tags and any other metadata.

Quick View Tabs

Immediately access dynamically updating subsets of specific content you routinely need by simply bookmarking your search.

Flagging & Permissions

Set user and group-based permissions for privacy as well as flag or mark for review content that requires special attention.

Retention & Expungement

Automated retention rules as well as the ability to completely expunge a file allow you to stay in control of your content.

Intelligent Case Folders

Easily identify evidence relevant to an incident with intelligent case folders that automatically aggregate the content for you.

Content Mapping

Content mapping provides valuable context to an incident by allowing you to see exactly where content was captured.

Notes & Annotations

Help make identifying and searching for important pieces of content easy by adding notes and time-stamped annotations to files.

Flexible File Sharing

Keep prosecutors, the media and others in the know by sharing files directly in-app or by providing an email link to content.

Audit Logging

Detailed audit logging allows you to track all activity on or with a piece of content to ensure admissibility of it in court.

Download Manager

To make the most of the systems you already have in place you can easily download content and audit logs to review and share.

Redaction Suite

Our redaction suite allow you to easily protect the privacy of the innocent, while providing transparency to the public.

WHY COMMANDCENTRAL VAULT?

Source-Agnostic

CommandCentral Vault can access content from any source via native integrations to our own portfolio, 3rd party system connectors or manual file uploading. This provides you with a single pane of glass to best leverage your digital evidence.

Our Digital Evidence Ecosystem:

[Si500 Video Speaker Microphone](#)

[The Capture Application](#)

[CommandCentral Aware](#)

[CommandCentral TipSubmit](#)

Intelligently Organized

By leveraging tags, file metadata and correlation with your CAD and RMS, content is easier to search, manage and review. This saves time and resources that can be put to use on more value-added, rather than administrative tasks.

Delivered as-a-Service

Cloud-based software-as-a-service is cost effective and optimizes your operation by being secure and reliable while delivering new capabilities regularly. It also allows us to iterate and implement feedback to better meet your needs.

THE COMMANDCENTRAL PLATFORM

CommandCentral Vault is your path forward for maximizing the value of digital evidence. But, it's also a part of something more. We build software for mission-critical environments where every second matters. By unifying big data and streamlining workflows from call to case closure, our CommandCentral Platform puts your information to better use, improves safety for critical personnel and helps keep your focus on the communities you serve.
